THREE NEW WAYS TO TURN UP THE EXCITEMENT

Ready to give your next gaming stop a serious jolt? Gold, thunder and good fortune are arriving on Inspired Valiant cabinets across Illinois - and each brings a completely different thrill.

CHASE THE FLASH

Gold Flash

If bright lights, fast action and "one more symbol!" suspense are your kind of fun, Gold Flash is ready to strike. Its 4x6 reels deliver 4,096 ways to win, with Cash and Pot symbols filling the screen and Collectors waiting on the outside reels. When a Collector lands, it scoops up every Cash and Pot value in view - including Pot prizes up to 250x your stake. One symbol, one electric sweep.

Land three or more Bonus symbols and the next move is yours. Choose Fever Games for multiplier Wilds, cash prizes and the chance to add up to 28 extra games. Or choose Gold Flash Fever Games, where only Collector, Cash and Pot symbols appear - and every spin guarantees at least one Collector.

Do you chase classic free-game action with multipliers, or jump into a feature built around collecting? Either way, the colors get hotter, the lightning gets louder and every stop of the reels feels charged with possibility. That is the spark of Gold Flash.

CALL DOWN THE THUNDER

Odin's Fortune

Ready to trade lightning for thunder? Odin's Fortune drops you into a fiery Nordic world where the all-father is waiting. Land the three Bonus symbols on reels 2, 3 and 4 to unleash 10 Fever Games and a cash prize. Glowing Orbs pay alongside line wins, and another set of Bonus symbols can retrigger 10 more games.

Land four or more Orbs and Thunder Blitz Win and Spin begins. You start with three spins as the triggering Orbs lock into place. Every new Orb also locks and resets the counter to three, keeping the feature alive while you unlock more rows. A grid that begins with four or five rows can grow to eight, with room for as many as 40 locked Orbs.

Orbs can carry cash values or reveal Mini, Minor, Major or Grand prizes, so every landing adds another crack of suspense. Will the next Orb open more space? Reset the spins? Push the grid closer to full? The feature builds one locked symbol at a time. The thunder is calling - are you ready to answer?

CHOOSE YOUR LUCKY POSITIONS

Fu Shen Zhu Fu Booster

Fu, Lu and Shou are back, and this time they are giving you a little say in where fortune might strike. Before you spin, Booster Positions appear on reels 1, 3 and 5 - and you can move each one to a spot that feels lucky to you. If a Bonus Ingot lands on your chosen position and triggers a bonus, that feature gets boosted. It is a simple choice that makes every spin feel personal.

Land three Bonus Ingots and the Fortune Bonus Pick begins. Reveal Fu, Lu, Shou and Wild symbols until one or more bonuses are awarded. Fu can expand the reels and send Wilds nudging across an entire reel. Lu brings Coin symbols loaded with cash and jackpot prizes. Shou can multiply line wins and reveal extra Fever Games or cash awards. Each character delivers a different route to the excitement.

Better yet, those routes can meet. Combine two characters to unlock Super Fever Games, or bring Fu, Lu and Shou together for the full Mega Fever Games celebration. With expanded reels, nudging Wilds, multipliers, jackpots and the possibility of multiple bonuses joining forces, Fu Shen Zhu Fu Booster keeps finding new ways to turn up the fortune. Pick your positions, trust your instincts and let the good-luck trio take it from there. Then find a participating Prairie State Gaming location, look for an Inspired Valiant cabinet and decide which of these three new adventures gets your first spin.
